## Objective

I am currently a fourth-year computer engineering student who is looking for a part-time job.

## Education

### 2015-2018 | DOKUZ EYLUL UNIVERSITY

- Current GPA is 3,53/4,00.
- Some Courses
  - Software Project Management
  - Introduction to Machine Learning
  - Applications of Decision Support Systems
  - Advances in Web Technologies
  - iOS Programming
  - Data Mining (Worked on Weka, RStudio, Azure Machine Learning Studio)
  - Embedded Systems (Worked with Arduino, courses about Intel 8051)
  - Mobile Devices and Applications (Android, Xamarin projects)
  - Circuit Theory and Electronics
  - Design and Implementation of Information Systems (PHP website and API development)
  - Computer Networks
  - Automata and Formal Languages
  - Software Engineering
  - Data Communications Applications
  - Operating Systems
  - Database Management Systems (SQL)
  - Project Based Learning I, II, III, IV (Developed different projects in C#, Java, C, and developed an Android Project)

### 2013-2015 | CELAL BAYAR UNIVERSITY

- Undergraduate transfer to Dokuz Eylul University.

### 2009-2013 | MUHARREM HASBI ANATOLIAN HIGH SCHOOL

## Skills & Abilities

### COMPUTER

- C
- C#
- Java
- React Native
- Angular 4/Typescript

- Ionic 3
- Android (Java)
- Swift
- ASP .NET / ASP .NET Core
- Javascript
- HTML/CSS
- Arduino
- PHP
- SQL
- XML
- Xamarin
- DJANGO
- Python
- Microsoft Office
- MATLAB
- Photoshop

## **FOREIGN LANGUAGES**

- English, Upper Intermediate - TOEFL iBT(03/02/2017) score 92
- Korean, Beginner
- Spanish, Beginner

## **Projects**

### **BENZINCI**

- Mobile application that people can find the latest gas oil prices and see the nearest gas stations and e-charge stations.

### **EVANT**

- Will be developed as senior project. An event oriented social media application with gamification included chat bot and Cortana support.

### **SAHAF**

- An Android and Windows 10 UWP application where users can buy/ sell 2nd hand books and lecture notes.

### **BAKKAL**

- Ing Bank 2016 Hackathon participation project. Developed a Windows 10 UWP application which helps people to get their market needs without going anywhere.

### **OKURRS**

- An Android and Windows 10 UWP application for reading news which is developed during internship.

## Courses & Certifications

**DJANGO GIRLS | 04.2017**

**CYBER ATTACK AND DEFENSE WORKSHOP | AKADEMIK BİLİŞİM | 02.2017**

**IT ESSENTIALS COURSE | CISCO | 01.2017**

**CRYPTOLOGY SUMMER SCHOOL | TUBITAK | 08.2016**

**CRYPTOLOGY | HACKTRICK | 03.2016**

**ANDROID APPLICATION DEVELOPMENT | AKADEMIK BİLİŞİM | 02.2016**

**QUICK READING | AKTIF AKADEMI | 08.2014**

**DRAMA COURSE, LEVEL 1 | AKTIF AKADEMI | 08.2014**

## Experience

**WORK | LEMONSOFT | 21.09.2017-17.11.2017**

- Designing mock-ups for an Ionic project using Balsamiq.
- Supporting the development of an Angular website.
- Developing a single page map web application using Angular.

**KTS INTERN | ECZACIBAŞI BİLİŞİM | 19.06.2017 – 19.08.2017**

- KTS (Career Test Drive) is an internship program of Eczacibasi which requires different tests to pass before being accepted. The evaluation process has 6 phases, which are
  - Conceptual Skill Test
  - Personality Inventory
  - English Test
  - Business Simulation
  - Comprehensive Interview with the HR and Mentor
- The candidates who pass all of these phases are accepted to internship and get an offer.
- Developed an Ionic 2 project.
- Wrote a web service using .Net Entity Framework API 2.
- After the internship, a presentation about the project is made to the managers and CEO of Eczacibasi Holding and Eczacibasi IT Department.

**INTERN | LEMONSOFT | 18.07.2016-12.08.2016**

- Developed Okurrs which is a mobile application for the company's Tubitak project.

**INTERN | DOKUZ EYLUL UNIVERSITY | 13.06.2016-15.07.2016**

- After training with Arduino, tested the usage of the hardware with NFC-UHF tags of the project and make improvements.
